

# VINYL INSTALLATION

---

## Supplies

Lettering  
Surface to apply it on  
Masking Tape  
Squeegee (Free for our customers)

Surface cleaner (glass cleaner or rubbing alcohol)  
Tape measure or ruler  
Pin or needle

**Step 1.** Clean the surface where the lettering is to be applied thoroughly with glass cleaner or rubbing alcohol to remove all oil and dirt. (Apply decals on a warm surface between 50°F and 80°F)

**Step 2.** Position lettering on surface with masking tape and measure.  
(Then measure again!)

**Step 3.** Apply masking tape horizontally over the top edge of the lettering to serve as a hinge.

**Step 4.** Cut between each letter or number so that each is independently hinged from the top. (Skip this step and go to step 5 with small lettering or one piece decals)

**Step 5.** Raise the lettering up over the top hinge and peel the liner back a few inches at a time.
